

DigiSlim[®]

The DigiSlim[®] display series is designed by PMS Perfect Media Solutions and offers highest flexibility and optimized picture quality.

DigiSlim[®] - a big advantage for your company

TModular in design, the DigiSlim[®] series allows for optimal adaptation to your company's brand strategy.

Whether color, technical specifications or special installation requirements - DigiSlim[®] supports the cost-optimized and high-quality implementation of your digital strategy in the retail sector.

In combination with the PMS PerfectShow[®] digital signage software, frame-accurate content syncing via WLAN enables frame-accurate content layout - orchestrated in the store concept - without complex video cabling and distribution.

This results in significant savings in rollout and service (time savings of up to 50%)

Green Signage:

- Optimized reparability and long-term availability of spare parts
- Metal housing for high stability, good heat dissipation and recyclability
- Significant reduction in power consumption due to tuned modules (up to 30% compared to conventional devices)
