

LED solutions

For digital support of the customer journey in the retail sector, LED surfaces are attention-grabbing and permanently attractive due to fast campaign changes.

For a more attractive shopping experience

LED modules have become indispensable for creative use in the retail sector. Whether flexible round modules or a special arrangement of modules - for the digital support of the customer journey in the retail sector, LED surfaces are eye-catching and permanently attractive due to quick campaign changes.

Depending on the project, the optimal products can be selected here - often looking at the parameters is the appropriate means to find a cost-efficient, long-lasting solution that will permanently delight your customers and keep upgrading the attractiveness of the shopping experience.

PMS is an independent consultant and planner of LED installations with an extensive network of all established suppliers and specialist manufacturers.

Talk to us, freely according to our motto "Customized to your needs".

If you want to ensure a conscious usage, it is important to take a series of parameters in consideration:

- Brightness
- Pixelpitch (0,6mm-8cm)
- Long-term availability
- Calibratability
- Contrast / black level
- Installation / service option (front / rear service)
- Temperature dissipation
- Colour depth
- Power consumption
- Indoor / outdoor
